17 **Attorneys for Plaintiffs**

18 **UNITED STATES DISTRICT COURT**
19 **NORTHERN DISTRICT OF CALIFORNIA**
20 **SAN JOSE DIVISION**

21 SOMTAI TROY CHAROENSAK and)
22 MARIANA ROSEN, Individually, And On)
23 Behalf Of All Others Similarly Situated,)

24 Plaintiff,

25 vs.

26 APPLE COMPUTER, INC.

27 Defendant.
28

CASE NO.: C05-00037 JW

CLASS ACTION

**SECOND AMENDED CLASS ACTION
COMPLAINT**

JURY TRIAL DEMANDED

1 Pursuant to Federal Rule of Civil Procedure 15 and to the Honorable Judge James Ware's
2 August 17, 2006 Order Granting Motion for Leave to Amend, Plaintiffs hereby file this Second
3 Amended Complaint.

4 **NATURE OF THE ACTION**

5 1. Plaintiffs Somtai Troy Charoensak ("Charoensak") and Mariana Rosen ("Rosen")
6 (collectively "plaintiffs") bring this action individually on behalf of themselves and on behalf of all
7 other similarly situated persons who have purchased online music recordings directly from Apple's
8 online iTunes music store for playback on portable hard drive digital music players. In the normal
9 course of business, a music Compact Disc ("CD") purchased at any neighborhood music store is
10 playable on any CD player of the customer's choosing. Thus, it would be egregious and unlawful
11 for a major retailer such as Tower Records, for example, to require that all music CDs purchased by
12 consumers at Tower Records stores be played only with CD players purchased at Tower Records.
13 Yet, this is precisely what Apple has done. Apple, which possesses monopoly market power in the
14 relevant market for the legal sale of online digital music files through its Apple iTunes online music
15 store, prevents consumers who purchase music recordings from Apple's iTunes online music store
16 from directly playing this music on any portable hard drive digital music player other than Apple's
17 own iPod portable digital music player. This unlawful bundling and tying arrangement violates the
18 federal antitrust laws and California's unfair competition law by suppressing competition, denying
19 consumer choice, and forcing consumers to pay supra-competitive prices for their digital portable
20 music players. Plaintiffs bring this class action individually and on behalf of all other similarly
21 situated consumers to seek redress for defendant's unlawful conduct.

22 **JURISDICTION AND VENUE**

23 2. Count I of this Complaint is brought pursuant to Section 1 of the Sherman Act, 15
24 U.S.C. § 1, to seek redress for Defendant's illegal tying and/or bundling conduct. This Court,
25 therefore, has subject matter jurisdiction over this count of the Complaint pursuant to 28 U.S.C. §
26 1331.

1 3. Count II of this Complaint is brought pursuant to Section 2 of the Sherman Act, 15
2 U.S.C. § 2, to seek redress for Defendant's monopolization of the market for online sales of digital
3 music files. This Court, therefore, has subject matter jurisdiction over this count of the Complaint
4 pursuant to 28 U.S.C. § 1331.

5 4. Counts III and IV of the Complaint is brought pursuant to Section 2 of the Sherman
6 Act, 15 U.S.C. § 2 to seek redress for Defendants' unlawful attempted monopolization of the
7 relevant markets alleged herein. This Court, therefore, has subject matter jurisdiction over these
8 counts of the Complaint pursuant to 28 U.S.C. § 1331.

9 5. Count V of this Complaint is brought pursuant to the California Cartwright Act,
10 California Business and Professions Code § 16700 et. seq. to seek redress for Defendant's unlawful
11 conduct in violation of state law. Because the facts underlying this count share a common nucleus
12 of operative facts and law with the remaining counts of this Complaint, this Court has supplemental
13 subject matter jurisdiction over this Count of the Complaint pursuant to 28 U.S.C. § 1367.

14 6. Count VI of the Complaint is brought pursuant to California's Unfair Competition
15 Law, California Business and Professions Code Section 17200 et. seq. Because the facts underlying
16 this count share a common nucleus of operative facts and law with the remaining counts of this
17 Complaint, this Court has supplemental subject matter jurisdiction over this Count of the Complaint
18 pursuant to 28 U.S.C. § 1367.

19 7. Count VII of the Complaint is brought pursuant to the common law of
20 monopolization. Because the facts underlying this counts share a common nucleus of operative facts
21 and law with the remaining counts of this Complaint, this Court has supplemental subject matter
22 jurisdiction over these Counts of the Complaint pursuant to 28 U.S.C. § 1367.

23 8. Defendant Apple Computer, Inc. is headquartered in Cupertino, California, transacts
24 significant business within this judicial district, and crafted the conduct giving rise to this complaint
25 within this judicial district. Venue in this district is, therefore, proper pursuant to 28 U.S.C. § 1391
26 and 15 U.S.C. § 22.

1 **PARTIES**

2 9. Plaintiff Somtai Troy Charoensak is a resident of California. During the Class
3 Period (as defined below), Plaintiff purchased music online from Apple's iTunes music store.

4 10. Plaintiff Mariana Rosen is a resident of New Jersey, and during the Class Period,
5 Rosen purchased music online from Apple's iTunes music store. As Apple has acted to prevent any
6 portable hard drive digital music player, other than its own Apple iPod, from directly playing digital
7 music files purchased at Apple's iTunes online music store, Plaintiffs were also forced to purchase
8 an Apple iPod device if they wished to play and portably enjoy the music they purchased online
9 from Apple's iTune's music store.

10 11. Defendant Apple Computer, Inc. ("Apple" or "Defendant") is a corporation
11 organized under the laws of the State of California, and having its principal place of business at 1
12 Infinite Loop in Cupertino, California 95014. Apple designs, manufactures, and sells personal
13 computers and related software, services, peripherals, and network solutions. Of particular
14 significance to this complaint, Apple also designs, develops, and markets a line of portable hard
15 drive digital music players, known as the Apple iPod, along with related accessories and services
16 including the online distribution, through its iTunes music store, of music and audio books.

17 **MARKET DEFINITIONS AND MARKET POWER**

18 12. For purposes of this complaint, there are two relevant product markets.
19 The first product market consists of the product market for legal online sales of digital music files.
20 The second product market consists of the product market for portable hard drive digital music
21 players. The relevant geographic market for both of these foregoing relevant product markets is the
22 United States.

23 **THE MARKET FOR LEGAL ONLINE SALES OF DIGITAL MUSIC FILES**

24 13. In the days before the advent and prevalence of the Internet, purchases of
25 music were generally limited to sales of records, tapes, and/or compact disc recordings through
26 traditional "brick and mortar" music stores. Although this sales channel continues to exist, the
27 advent of the Internet has created a new market, wherein consumers can search for and purchase
28 music tracks of their choice via their computer by simply logging onto the Internet. When this new

1 market first came into being, its legality was called into question and was the subject of contentious
2 litigation, as was epitomized by the much publicized “Napster” litigation. The result of this
3 litigation history was that the marketplace recognized a need for legitimate outlets wherein
4 consumers could avail themselves of their Internet access to make online purchases of digital music
5 files in legitimate and lawful transactions.

6 14. Defendant Apple recognized the need and potential for such a market,
7 and on approximately April 28, 2003 launched its iTunes online music store (“iTunes”). iTunes,
8 which any consumer with access to the Internet can access by merely logging onto the Apple
9 iTunes’ website, is both an online music selling venue and a software package. iTunes allows
10 consumers to log onto Apple’s iTunes online store, and browse for various digital files of songs and
11 music recordings by thousands of individual artists and virtually all of the major music recording
12 labels.

13 15. Users of the iTunes store may then choose to purchase a particular track of
14 music. Currently iTunes charges \$0.99 per track of music. Unlike a purchaser at a traditional
15 “brick and mortar” music store, users of iTunes who purchase a track of music do not walk away
16 with an audio cassette tape or record album. Instead, upon purchasing a track of music and paying
17 the requisite price for the purchase, a digital file containing the music purchased is downloaded
18 from Apple’s iTunes site to the user’s computer or portable hard drive digital music player, where it
19 may be stored for further use by the user. The process by which this digital music file is transmitted
20 and used is described more fully in paragraphs 28-54 below.

21 16. There is a recognized distinct product market for the legal purchase of
22 digital music files online. Consumers and merchants have come to recognize the online digital
23 music file sale market as a separate and distinct market.

24 17. The online digital music file market offers a number of features not
25 readily available at traditional “brick and mortar” music stores, which help set this online digital
26 music file market apart as a distinct market. For example, whereas shoppers at traditional “brick
27 and mortar” music stores must typically purchase an entire album of the artist or group selected,
28 online sales of digital music files offer consumers the option to purchase only individual songs or

1 tracks of music separately. Further, unlike traditional “brick and mortar” music stores, online music
2 selling venues offer consumers the ability to create their own customized “playlists” wherein
3 consumers can, in effect, create their own customized music album comprising individual songs
4 from various artists. Thus, for example, a consumer of online music stores that had a liking for the
5 song “Help” from the Beatles and the song “Goodbye Yellow Brick Road” from Elton John could
6 create a customized playlist that would comprise just these two songs (as well as any other song
7 from any other artist that consumer wished to purchase). That consumer would only be charged for
8 the particular songs purchased (i.e. in this case, “Help” and “Yellow Brick Road”). By contrast, if
9 that same consumer wished to avail himself of these same two songs by making purchases at a
10 traditional “brick and mortar” music store, that consumer would have to purchase an entire Beatles
11 album containing a dozen songs or more, and an entire Elton John album, which also contains
12 approximately a dozen songs or tracks. Thus, while the consumer of the iTunes online music venue
13 would only pay \$1.98 for his total purchase (i.e. \$0.99 per song), the price paid by the same
14 consumer at a traditional “brick and mortar” store would likely be approximately \$30.00—i.e. the
15 price for two complete albums or CDs.

16 18. In addition, the music selection available at online music stores is not
17 coextensive with the music selection available at traditional “brick and mortar” music stores. Due
18 to the efficiency with which music can be saved into computer digital format, online music stores
19 provide a ready outlet for independent artists and music labels whose music is not readily available
20 at traditional “brick and mortar” music stores that necessarily carry media in the more expensive
21 CD, cassette or record format.

22 19. In the eyes of consumers, the online digital music file market and the “brick and
23 mortar” market are not in price-competition with one another. For one thing, as mentioned herein,
24 whereas the online digital music file market focuses on selling individual tracks or songs, the “brick
25 and mortar” market is focused on selling whole albums or CDs, thereby making price-comparison
26 between these two distinct markets a non sequitur. Further, because of the ubiquitous nature of the
27 Internet, online music sales are available to a whole host of consumers who do not have ready
28 access to a nearby “brick and mortar” music store, let alone a nearby “brick and mortar” store

1 stocking the particular recording desired by these consumers at any given time. Similarly, because
2 search costs on the Internet are a fraction of search costs involved in the “brick and mortar” market,
3 consumers are not likely to and do not forego a purchase of a music recording online even if they
4 hypothetically would believe that the same recording could be obtained somewhat less expensively
5 at a traditional “brick and mortar” store. The costs associated with traveling to “brick and mortar”
6 music stores, searching one or more such stores for a particular recording, and comparison shopping
7 between these “brick and mortar” music stores and online stores dissuade consumers from foregoing
8 a purchase made from the comfort of their own home or office for the same piece of music, even if
9 doing the foregoing tasks could hypothetically result in a savings of a few cents per song. Put
10 differently, consumers are not likely to and do not travel miles to their nearest “brick and mortar”
11 music store in the hopes of saving a few cents off a song purchase that they could make
12 instantaneously on their home computer.

13 20. For these and other reasons, the market for legal online sales of digital
14 music files is and has been recognized as a separate relevant product market.

15 21. Within the relevant market for online legal sales of digital music files,
16 Defendant Apple, through its iTunes online music store, possesses and has possessed throughout the
17 Class Period monopoly market power sufficient to exclude competition. Upon information and
18 belief, during the Class Period iTunes’ share of this relevant market has exceeded 80 percent.
19 Indeed, on its website, Apple touts its iTunes online music store as the “#1 music download store
20 according to Nielsen Soundscan.” Apple’s iTunes website also touts that iTunes is “[s]etting a new
21 milestone for the online music business, the iTunes Music Store has sold more than 200 million
22 songs.” Further, as early as November 5, 2003, Apple CEO Steve Jobs publicly confirmed at a
23 financial analyst conference that Apple’s iTunes store possessed at least an 80 percent share of the
24 legal music download market.

25 22. Other legal online music selling stores exist, such as: Napster, Walmart.com,
26 Musicmatch, RealPlayer, Buy.com, Sony Connect, eMusic, Music Rebellion, Audio Lunch Box,

1 Live Downloads, and Bleep among others. None of these other online music sites, however, posses
2 any significant market share in comparison to Apple's iTunes music store, and hence their existence
3 does not pose price-constraining competition to Apple's iTunes online music store.

4 **THE MARKET FOR PORTABLE HARD DRIVE DIGITAL MUSIC PLAYERS**

5 23. The second relevant market pertinent to this complaint consists of the
6 relevant market for portable hard drive digital music players. Portable hard drive digital music
7 players are portable devices that enable their users to listen to digital audio recordings without
8 requiring users to carry any external media, such as a compact discs, cassette tapes, or cartridges.
9 Since approximately November 10, 2001, Apple has manufactured, marketed, sold, and shipped a
10 portable hard drive digital music player known as the "iPod."

11 24. As stated, when a consumer purchases a digital music recording online, a
12 digital file with that music recording is downloaded to that consumer's computer or portable hard
13 drive digital music player for future use. One use to which that digital audio file can be put to by the
14 consumer is to play back that audio digital file on a portable hard drive digital music player.

15 25. Through its iPod device, Apple sells the best-selling portable hard drive
16 digital music player. Other portable hard drive digital music player manufacturers do exist,
17 including: Rio, iRiver, Creative, Archos, e.Digital, RCA, Panasonic, Nokia, Tatung, Epson,
18 Gateway, and others. Due to Apple's conduct detailed herein, however, none of these other portable
19 hard drive digital music player manufacturers can directly play digital music files purchased by
20 consumers from Apple's iTunes online music store.

21 26. As detailed herein, Apple has unlawfully bundled, tied, and/or leveraged its
22 monopoly in the market for the sale of legal online digital music recordings to thwart competition in
23 the separate market for portable hard drive digital music players.

24 27. As shown more fully below, Apple has engaged in this wrongdoing by
25 embedding a code in all digital music files downloaded from Apple's iTunes online music store that
26 forces consumers wishing to play these files on a portable hard drive digital music player to do so
27 only on an Apple iPod. Absent Apple's unlawful action, consumers purchasing music recordings
28 from Apple's iTunes music store would be able to play this music directly on the portable hard drive

1 digital music player of their choosing, including the portable hard drive digital music players
2 manufactured by the rival manufacturers listed in paragraph 24 herein. By deliberately embedding
3 its code in this manner in all digital music files sold by iTunes, therefore, Apple has unlawfully
4 leveraged, bundled and/or tied its monopoly market power in the market for online sale of digital
5 music files to thwart competition in the separate market for portable hard drive digital music
6 players.

7 28. Similarly, by embedding this code into all digital music files sold by Apple on its
8 iTunes store, Apple has been able to design and has designed its iPod portable hard drive digital
9 music player so that the iPod will only directly play digital music files purchased by the user online
10 if that music file was purchased online from Apple's iTunes music store. If the digital music file
11 was purchased from any other online music selling venues listed in paragraph 21, the iPod will not
12 directly play that music recording. By engaging in this unlawful conduct, therefore, Apple has tied,
13 bundled and/or leveraged its monopoly market power in the market for online music sales to thwart
14 competition in the separate market for portable hard drive digital music players. At the same time,
15 by engaging in this unlawful conduct, Apple has managed to unlawfully maintain and/or attempt to
16 obtain its monopoly market power in the market for online music sales because owners of the
17 monopolized iPod product who wish to purchase music tracks online have no choice, given Apple's
18 conduct, but to purchase these tracks only from Apple's iTunes store.

19 **APPLE'S ANTICOMPETITIVE CONDUCT**

20 29. To more fully appreciate and understand the anticompetitive nature of
21 Apple's wrongdoing, it is helpful to understand a few fundamentals about the process of digitizing,
22 downloading, and playing digital music recordings.

23 30. At their most basic level, digital music files, such as MP3 files, look a lot
24 like any other computer data file: a long series of 1s and 0s. In order to turn an analog signal (such
25 as one picked up by a standard microphone) into a digital stream, analog-to-digital converter
26 ("ADC") software measures the signal at a regular interval to find the sampling rate. These samples,
27 if measured close enough together, form a near-exact representation of the analog signal so as to
28 approximate the transmission using 1s and 0s that computers and MP3 players can read.

1 31. Each second of true CD-quality sound takes up more than 1.3MB of disk
2 space, which is why file-compression technology is essential to digital audio, especially portable
3 audio. Using principles of psychoacoustics (how the brain perceives sound) and perceptual coding
4 (eliminating imperceptible sounds), engineers develop algorithms, called codecs (compression
5 decompression), that compress songs into the smallest possible sizes with minimal loss of quality.

6 32. When a user plays a digital music file, the user essentially reverses the
7 analog-to-digital process. A digital audio device, such as an MP3 player or a computer sound card,
8 uses a DAC (digital-to-analog converter) to turn the 1s and 0s back into an analog signal that can
9 then be amplified and broadcast over headphones or speakers. When a digital device plays music
10 that has been compressed by a codec, software on its chip (called firmware) applies the codec to
11 decode the file, then sends the decompressed 1s and 0s to the DAC. Thus, for a digital audio device
12 to be able to play a compressed music file, that device's hardware must be able to recognize and
13 decode the codec software format that was used to initially compress that audio file.

14 33. The first format or codec to gain widespread acceptance was Motion Pictures Experts
15 Group Layer 3, known more commonly as "MP3." Today, virtually every portable digital music
16 player on the market is able to play digital music encoded using the MP3 format. Thus, virtually all
17 portable digital music players are able to play MP3 music files.

18 34. Over the years, however, codec formats other than MP3 have gained widespread
19 acceptance. These formats include WMA, AIFF, AAC, AA, and others.

20 35. Many major portable digital music players support a number of these
21 formats in addition to the MP3 format. For example, most portable hard drive digital music players,
22 except for iPod, support the WMA format, which is the acronym for Microsoft's Windows Media
23 Audio format. Thus, digital music files compressed with the WMA codec can be played on most
24 major portable digital music players on the market today, except for Apple's iPod.

25 36. Of significance to this complaint, is a codec format commonly known by
26 the acronym AAC. AAC stands for Advanced Audio Coding, and was a format developed by, *inter*
27 *alia*, Dolby Laboratories. Compressing digital audio files using the AAC format purportedly allows
28 more files to be stored per file size than would be possible if the same music files were compressed

1 using the MP3 format. Of significance, under normal operation, files compressed with the AAC
2 format, much like files originally compressed and saved on any other coded format, can be saved or
3 converted to MP3 formatted files. Thus, under normal operation, a digital music file that was
4 originally compressed and saved with an AAC codec format can be played either by a device
5 supporting AAC encoded files, or alternatively, that music file can be converted to and saved as an
6 MP3 formatted file, which would then be playable on virtually every major portable hard drive
7 digital music player (because all portable hard drive digital music players support MP3 files).

8 37. Apple's iPod is a portable digital music player capable of playing music
9 files compressed with the AAC codec format. Other rival portable digital music players, including
10 those manufactured by Nokia, Creative, Panasonic, Epson, Tatung, Gateway, Digital Square, and
11 others are also similarly equipped to play AAC digital music files. In addition, of course, because
12 AAC files can readily be converted to MP3 format, virtually every portable digital music player on
13 the market today can play a file that was originally encoded in AAC format by merely having that
14 same file converted and saved to MP3 format.

15 **Apple's Unlawful Manipulation of the AAC Format To Force Use of Apple's iPod**

16 38. Apple's iTunes online music store's music files are encoded in AAC
17 format. As the foregoing illustrates, therefore, consumers purchasing music from iTunes should and
18 would be free to play the songs purchased from iTunes at any of a number of portable hard drive
19 digital music players that can play AAC formatted files, or at virtually any portable digital music
20 player by merely converting the AAC file to an MP3 file.

21 39. Apple, however, has manipulated and rigged the AAC format to prevent
22 this competitive scenario. Specifically, Apple has altered the AAC format used to compress and
23 record the song recordings available at its iTunes online music store so that these songs cannot be
24 played directly on any portable hard drive digital music player other than Apple's own iPod. Apple
25 has done so by incorporating into the AAC file format an Apple addition known as Fairplay Digital
26 Rights Management ("DRM").

1 40. Fairplay DRM is an extra piece of software code that Apple adds to every
2 music file sold by Apple on its iTunes online music store. The addition of this extra software code
3 has the effect of preventing any portable hard drive digital music player, other than Apple's own
4 iPod player, from playing songs purchased from Apple's iTunes music store. Users purchasing
5 songs from iTunes can still play those songs on their computers (whether they be manufactured by
6 Apple or not), but if these users wish to play the music they just purchased from iTunes on a
7 portable hard drive digital music player, they can only do so directly on an iPod. Thus, in effect,
8 Apple has turned an open and interactive standard into an artifice that prevents consumers from
9 using the portable hard drive digital music player of their choice, even where players exist that
10 would otherwise be able to play these music files absent Apple's actions.

11 41. Another consequence of Apple's manipulation of the AAC codec format, is that
12 Apple's addition of its Fairplay DRM code portion to these music files makes it impossible to
13 convert these AAC music files into MP3 files that can be decompressed and played directly by
14 portable hard drive music players other than the iPod. Thus, whereas absent Apple's action, all
15 AAC files could be converted to MP3 format and therefore could be played on virtually any major
16 portable hard drive digital music player on the market, Apple's action prevents this from happening,
17 and forces a user to use only Apple's iPod device as the sole portable hard drive digital music player
18 capable of playing files purchased at Apple's iTunes music store.

19 42. Apple calls this rigged digital format, obtained after incorporating Apple's
20 extra Fairplay DRM software code to the AAC file, an "AAC Protected" format or file. Apple
21 blatantly announces that the difference between a regular AAC formatted music file and Apple's
22 "Protected AAC" music file is that if one desires to play the latter type of file (which is an artifice of
23 Apple's iTunes online music store) on a portable hard drive digital music player, one can only do so
24 directly on an Apple iPod player. In this regard, Apple's website proclaims the following with
25 respect to AAC, AAC Protected music files, and the relationship between iTunes, iPod, and other
26 portable players:

1 To play AAC and AAC Protected songs, your iPod must have iPod Software 1.3 or
2 later installed. Not all digital music players can play AAC songs and ***only iPod can
play AAC Protected songs.***

3

4 ***Songs purchased from the iTunes Music Store are encoded using the AAC
Protected format and cannot be converted to MP3 format.*** You can burn them to
5 audio CDs and play them in consumer audio CD players.

6 A copy of Apple's webpage containing the foregoing restriction is attached hereto as Exhibit A to
7 this complaint.

8 43. Thus, as Apple itself admits on its website, "[s]ongs purchased from the iTunes
9 Music Store are encoded using the AAC Protected format and cannot be converted to MP3 format."
10 Further, "only iPod can play AAC Protected songs." The result is readily apparent—customers
11 buying music online from Apple's iTunes store can play their music at their computer or CD player,
12 but if they wish to play the music on a portable hard drive digital music player, they can do so only
13 via Apple's iPod. Moreover, this restriction, as Apple itself admits, is brought about only because
14 Apple has unilaterally incorporated its Fairplay DRM extra software code into the otherwise
15 interactive AAC format.

16 44. But for Apple's action, any consumer owning any portable digital music player
17 would have been able to convert a song purchased on AAC format from iTunes into an MP3
18 formatted file, and could have played that file on his portable hard drive digital music player of
19 choice. This is necessarily the case because virtually any portable digital music player on the
20 market today is capable of playing MP3 music files. Further, even without this conversion from
21 AAC to MP3 formats, absent Apple's manipulation of the AAC format for the songs it sells through
22 iTunes, songs purchased from iTunes would have been able to be played on a whole host of portable
23 hard drive digital music players that are capable of playing AAC formatted files, such as players
24 manufactured by Panasonic, Nokia, Gateway, Epson, Tatung, and others. Apple's unilateral action
25 to rig the AAC format in this fashion for the songs it sells through iTunes, by inserting its own
26 Fairplay DRM extra software code onto the AAC format, prevents any of the foregoing from taking
27 place, and restricts consumers to using Apple's iPod as their only available portable hard drive
28 digital music player.

1 45. Apple has steadfastly refused to license its Fairplay DRM or otherwise let any other
2 manufacturer of portable hard drive digital music players gain interactive access to files sold by
3 Apple through iTunes so that these music files could be played in the portable hard drive digital
4 music player of the consumer's choice.

5
6 46. Through the foregoing actions, Apple has misused its monopoly market
7 power in the market for the legal sales of digital music files (which it holds by virtue of its iTunes
8 online music store) to unlawfully suppress competition in the separate market for portable hard
9 drive digital music players.

10 **Apple's Resistance to Rival Online Song Outlets for Apple iPod**

11 47. As stated in paragraph 31, for a device to play a digital music file compressed with a
12 particular format, firmware within the chip of the device must be able to recognize and decode the
13 encoding format used to compress the music file. Because Apple has rigged the otherwise
14 interactive AAC format, through the addition of its extra Fairplay DRM software code to music files
15 sold via iTunes, only portable hard drive digital music players whose firmware recognizes this
16 "Protected AAC" format can decode and play songs purchased from iTunes. Apple has not licensed
17 or given access to this "Protected AAC" format to any other portable hard drive device
18 manufacturer, thereby ensuring two results—both of which are anticompetitive. First, through the
19 foregoing, Apple has managed to ensure that songs purchased from iTunes can only be played on
20 portable hard drive digital music players manufactured by Apple; namely, the Apple iPod. Second,
21 through the foregoing, Apple has managed to ensure that owners of iPod hard drive digital music
22 players wishing to purchase music files online to be directly played on their iPod can only do so by
23 purchasing these files at Apple's iTunes music store.

24 48. Despite this anticompetitive restriction, RealNetworks, a rival seller of
25 online digital music recordings through its RealNetworks Music Store, managed to independently
26 analyze the firmware within the Apple iPod portable hard drive digital music player. As a result of
27 this analysis, RealNetworks was able to discern the necessary extra software code added by Apple to
28 make downloaded songs playable on the Apple iPod. Armed with this knowledge, RealNetworks

1 was able to insert a corresponding code of its own into song files sold through its RealNetworks
2 Music Store so that they too would be playable on the Apple iPod.

3 49. Thus, on July 26, 2004, RealNetworks announced publicly that songs sold through
4 its online RealNetworks Music Store would now be playable on the Apple iPod portable hard drive
5 digital music player, thereby giving iPod owners a competitive outlet for their purchases of online
6 music files. This announcement was significant not only because it represented the first alternative
7 to the stronghold that Apple's iTunes store had heretofore exerted as the sole supplier of
8 downloaded digital music files that could be played on Apple's iPod player, but also because
9 RealNetworks began selling its digital online songs for as low as 49 cents per track, well below the
10 99 cents per track charged by Apple's iTunes store.

11 50. Rather than embracing this competitive offering to consumers and owners
12 of its iPod device, Apple immediately threatened RealNetworks and iPod users. On Thursday, July
13 29, 2004, merely four days after RealNetworks' announcement, Apple issued its own public
14 statement warning RealNetworks and iPod users that "[w]e are stunned that RealNetworks has
15 adopted the tactics and ethics of a hacker to break into the iPod, and we are investigating the
16 implications of their actions under the DMCA and other laws. We strongly caution Real and their
17 customers that when we update our iPod software from time to time it is highly likely that Real's
18 Harmony technology will cease to work with current and future iPods."

19 51. True to its threat, by December 2004, Apple updated its iPod software to prevent
20 songs downloaded from RealNetworks Music Store (or any other online music store) from being
21 played on Apple iPod devices. Thus, Apple continues to impede competition, and forces iPod users
22 who wish to buy music online to do so exclusively from Apple's iTunes store.

23 **Apple's Proffered Justification For Rigging the AAC Format In This Restrictive Manner Is**
24 **Irrelevant, And In Any Event, Unavailing**

25 52. Faced with the obvious anticompetitive effect and impact of its actions to restrict the
26 use of music purchased on iTunes to only iPod portable music players, and to restrict the source of
27 online music files playable on its iPod device to only its own iTunes store, Apple has attempted to
28 defend its actions by citing that these restrictions are necessary to protect the copyrights owned by

1 the artists or music labels for the songs sold through iTunes. That defense, however, is both
2 irrelevant and unavailing.

3 53. In fact, other than Apple's iTunes, no other online music vendor has such a
4 restriction in place; yet these other online vendors still manage to provide copyright protection
5 mechanisms to artists and record labels—often the same artists and labels whose same songs are
6 sold online through iTunes.

7 54. Similarly, Apple's Fairplay DRM addition to the otherwise interactive
8 AAC encoding format is not a device that effectively controls access to copyrighted works because,
9 as Apple itself admits, the extra Fairplay DRM software code inserted by Apple has no effect
10 whatsoever on the ability of any user using any computer to access, purchase, and playback any of
11 the song files sold through Apple's iTunes music store on the user's computer. Only when the user
12 wishes to play the song on a portable hard drive digital music player does Apple restrict that user to
13 using the iPod device, presumably to protect Apple's market dominance in that market.

14 55. In truth and in fact, as widely reported in the press, artists and record label companies
15 have urged Apple to release its stronghold on the online source for music files playable on the Apple
16 iPod, and to allow music files from other legitimate online music vendors play on the Apple iPod.
17 Opening this restriction would benefit both the artists and record labels by providing them with
18 additional outlet channels for selling music playable on the most prevalent portable hard drive
19 digital music player (i.e. the iPod). Similarly, opening this restriction would also benefit consumers
20 by providing iPod owners with a competitive choice of where they can purchase their online music
21 files for playback on their iPod devices. Despite these pleas and the anticompetitive impact of
22 Apple's actions, Apple has steadfastly refused to permit any vendors other than its own iTunes store
23 to sell digital music files that can be played on Apple's iPod. At the same time, Apple has also
24 steadfastly refused to allow the music files Apple sells through its iTunes store from being played
25 on any portable hard drive digital music player other than the iPod.

26 ///

27 ///

28 ///

1 **ANTICOMPETITIVE EFFECT ON CONSUMERS – ANTITRUST INJURY**

2 56. As a direct, proximate, and foreseeable result of Apple's actions, consumers, like
3 Plaintiff and the members of the Class he seeks to represent, have been injured in their business
4 and/or property. By restricting the sources of online digital music files that can be directly played
5 on Apple's iPod to only such files purchased from Apple's iTunes online music store, Apple has
6 restrained competition, denied consumers a competitive choice of online music sellers for use on
7 their iPod devices, maintained its monopoly and/or attempted to obtain a monopoly in the market
8 for portable hard drive digital music players, and forced consumers to pay supra-competitive prices
9 for their purchases of online digital music files and their purchases of portable hard drive digital
10 music players. Similarly, by restricting the portable hard drive digital music players that can play
11 songs downloaded from the iTunes online music store to just the Apple iPod device, Apple has
12 restrained competition, denied consumers a competitive choice of portable hard drive digital music
13 players, unlawfully maintained and/or attempted to obtain a monopoly in the market for the legal
14 sale of online digital music files, and caused consumers to pay supra-competitive prices for their
15 purchases of portable hard drive digital music players, and for their purchases of online music files.

16 **CLASS ACTION ALLEGATIONS**

17 57. Pursuant to Federal Rule of Civil Procedure 23, Plaintiff brings this action on behalf
18 of himself and on behalf of all other similarly situated consumers who, during the period April 28,
19 2003 to the present ("the Class Period") purchased an iPod device directly from Apple, and online
20 digital music files from Apple's iTunes store. Excluded from the Class are all judicial officers and
21 their staff, as well as all governmental entities.

22 58. The number of putative class members is sufficiently large, such that joinder of all
23 individual class members would be impracticable, if not impossible. Although the precise number
24 of class members is not presently known to Plaintiff, based on the sales volumes of the Apple iPod
25 device and the iTunes online music store during the Class Period, it is reasonable to assume that the
26 number of individual class members is at least in the tens or hundreds of thousands.

1 59. Plaintiff's claims are typical of the claims of the class. Specifically, Plaintiff claims
2 that by restricting the use of the iPod to only those online digital music files purchased from iTunes,
3 Apple has injured Plaintiff and the class members in their business and/or property, in violation of
4 the federal and state antitrust laws, California's unfair competition law, and the common law.
5 Similarly, Plaintiff claims that by restricting the portable hard drive digital music players that can
6 play music files purchased from the iTunes store to only the iPod, Apple has injured Plaintiff and
7 the class members in their business and/or property, in violation of the federal and state antitrust
8 laws, California's unfair competition law, and the common law. There are no conflicts or defenses
9 unique to Plaintiff that would render his claim atypical from the claims of the absent class members.

10 60. Common questions of fact and law exist in this litigation, and these common
11 questions affecting the class as a whole predominate over any individual questions that may affect
12 only individual class members. Among these common questions of fact or law are the following:

- 13 a. The definition of the relevant market(s);
- 14 b. Apple's market power within these relevant market(s);
- 15 c. Whether Apple unlawfully restrained competition in any or all of these relevant
16 markets;
- 17 d. Whether any unlawful restriction of competition caused by Apple caused injury to
18 the business or property of Plaintiffs and the class members;
- 19 e. The extent of any such injury;
- 20 f. The appropriate remedy for any such injury.

21 61. Plaintiff is an adequate representative of the interests of the absent class members in
22 this litigation. During the Class Period, Plaintiff purchased an Apple iPod directly from Apple, and
23 purchased music files for use on his iPod directly from Apple's iTunes music store. Plaintiff has
24 retained competent counsel experienced in antitrust and class action litigation to vigorously
25 prosecute and litigate this action on behalf of the putative class members.

26 62. This action is manageable as a class action. The identity of all class members, or of a
27 significant majority, is ascertainable, as each class member, by definition, must have made online
28 purchases from Apple iTunes store, requiring the class member to provide his identifying

1 information. Prosecuting this action on an individual, as opposed to a classwide, basis would risk
2 the prospect of conflicting findings and adjudications with respect to the rights and obligations of
3 the parties. Further, the average overall amount of monetary injury sustained by each individual
4 class members is likely to be too small relative to the costs of individual litigation of this action so
5 that classwide litigation effectively provides the only available means for individual class members
6 to seek judicial redress for their injuries.

7 **COUNT I**

8 **(UNLAWFUL TYING OR BUNDLING OF APPLE iTunes TO PURCHASE OF APPLE**
9 **iPOD IN VIOLATION OF 15 U.S.C. § 1)**

10 63. Plaintiff hereby incorporates by reference all of the allegations of this
11 complaint with the same force and effect as if fully restated herein.

12 64. Through its iTunes online music store, Apple has monopoly market power in the
13 U.S. market for legal sales of online digital music files. In any event, Apple has sufficient market
14 power in this relevant market to coerce consumers of Apple's iTunes store to purchase an Apple
15 iPod portable hard drive digital music player, even if these same consumers would have preferred to
16 purchase a portable hard drive digital music player other than Apple's iPod.

17 65. There are manufacturers and models of portable hard drive digital music
18 players, other than Apple's iPod, that, but for Apple's anticompetitive conduct, would be able to
19 play digital music files downloaded from Apple's iTunes music store.

20 66. During the Class Period Apple has rigged the otherwise interactive and
21 open AAC codec format in the manner described herein, such that digital music files purchased
22 from Apple's iTunes online music store could not be played back on any portable hard drive digital
23 music player other than Apple's iPod.

24 67. As a direct and proximate result of Apple's anticompetitive actions,
25 consumers of Apple's iTunes store who wish to play the digital music files they purchased from
26 iTunes on a portable hard drive digital music player must also purchase an Apple iPod device, even
27 where other portable hard drive digital music players exist at lower prices that would otherwise be
28 able to playback the music files sold by Apple's iTunes store.

68. Apple's actions have caused injury to the business and/or property of Plaintiff and the class members he seeks to represent by: forcing consumers to buy Apple's iPod as the portable hard drive digital music player of their choice, to the exclusion of all competing portable hard drive digital music players; suppressing competition in the market for portable hard drive digital music players; and, forcing consumers to pay supra-competitive prices for their portable hard drive digital music players.

69. Apple's unlawful bundling or tying of its Apple iTunes store to use of its Apple iPod portable hard drive digital music player is unlawful per se under the antitrust laws. Alternatively, Apple's unlawful bundling or tying of its Apple iTunes store to use of its Apple iPod portable hard drive digital music player is unlawful under the antitrust rule of reason because the anticompetitive effects of this conduct are not outweighed by procompetitive considerations.

COUNT II

**(UNLAWFUL ACQUISITION OR MAINTENANCE OF MONOPOLY MARKET POWER
IN MARKET FOR LEGAL ONLINE DIGITAL MUSIC FILES IN VIOLATION OF
15 U.S.C. § 2)**

70. Plaintiff hereby incorporates by reference all of the allegations of this complaint with the same force and effect as if fully restated herein.

71. Through its iPod device, Apple possesses monopoly market power in the U.S. market for portable hard drive digital music players.

72. Given the prevalence of the iPod, owners of this device have a need for legal online sellers of digital music files to be played on the iPods. Although a number of competing legal online sellers of digital music files exist, Apple has rigged the operating AAC codec format and corresponding firmware in the iPod so that only online digital music files purchased from Apple's iTunes music store, to the exclusion of all other online music files purchased from any other online store, can be directly played on the iPod. In this manner, Apple has been able to acquire and/or maintain monopoly market power in the U.S. market for the legal sale of digital music files. But for Apple's rigging of the AAC codec format and firmware in the iPod, any number of existing legal sellers of digital music files, other than Apple's iTunes music store, would be able to sell competing digital music files for play back on the iPod.

73. Thus, Apple has acquired and/or maintained its monopoly market power in the U.S. market for the legal sale of online digital music files, not through superior skill, business acumen, or enterprise, but rather through the foregoing anticompetitive and exclusionary conduct.

74. Apple's monopolization of the U.S. market for the legal sale of online digital music files has injured Plaintiff and the Class members in their business and/or property by suppressing competition in this relevant market, and forcing consumers to pay supra-competitive prices for their online purchases of digital music files.

COUNT III

**(UNLAWFUL ATTEMPTED MONOPOLIZATION OF MARKET FOR PORTABLE
HARD DRIVE DIGITAL MUSIC PLAYERS IN VIOLATION OF 15 U.S.C. § 2)**

75. Plaintiff hereby incorporates by reference all of the allegations of this complaint with the same force and effect as if fully restated herein.

76. The foregoing allegations of predatory and/or anticompetitive conduct, including, *inter alia*: a) Apple’s rigging of the open AAC format to an “AAC-protected” format; b) Apple’s predatory change to its software to prevent less expensive music files sold by RealNetworks from playing directly on Apple’s iPod; c) the tying allegations forming part of Counts I and II of this Complaint; and, d) Apple’s unlawful monopoly leveraging, wherein Apple has used its monopoly market power, however acquired, in the market for legal sales of online digital music files, in an attempt to monopolize the separate market for portable hard drive digital music players, all form part of an unlawful attempted monopolization offense under 15 U.S.C. § 2.

77. Apple undertook the foregoing conduct with the specific intent to monopolize the relevant market for portable hard drive digital music players.

78. If left unrestrained, Apple's attempt to monopolize the market for portable hard drive digital music players is likely to succeed.

79. The foregoing conduct has caused injury to Plaintiff and the class members in their business and/or property by unlawfully thwarting competition in the market for portable hard drive digital music players and by forcing consumers, like Plaintiff and the class members, to pay supra-competitive prices for their portable hard drive digital music players.

1 **COUNT IV**

2 **(ATTEMPTED MONOPOLIZATION OF MARKET FOR THE LEGAL ONLINE SALE OF**
3 **DIGITAL MUSIC FILES, IN VIOLATION OF 15 U.S.C. § 2)**

4 80. Plaintiff hereby incorporates by reference all of the allegations of this complaint with
5 the same force and effect as if fully restated herein.

6
7 81. The foregoing predatory and/or anticompetitive allegations, including, *inter alia*: a)
8 Apple's rigging of the open AAC format to an "AAC-protected" format; b) Apple's predatory
9 change to its software to prevent less expensive music files sold by RealNetworks from playing
10 directly on Apple's iPod; c) the tying allegations forming part of Counts I and II of this Complaint;
11 and, d) Apple's unlawful monopoly leveraging conduct, wherein Apple has used its monopoly
12 market power, however acquired, in the market for portable hard drive digital music players, in an
13 attempt to and actual monopolization of the separate market for the legal online sale of digital music
14 files, all form part of Apple's unlawful attempt to monopolize the relevant market for the legal
15 online sales of digital music files, in violation of 15 U.S.C. § 2.

16 82. Apple undertook the foregoing conduct with the specific intent to monopolize the
17 relevant market for the legal online sales of digital music files.

18 83. If left unrestrained, Apple's attempt to monopolize the market for the legal online
19 sales of digital music files is likely to succeed.

20 84. The foregoing conduct has caused injury to Plaintiff and the class members in their
21 business and/or property by unlawfully thwarting competition in the market for the legal online
22 purchases of digital music files, and by forcing consumers, like Plaintiff and the class members, to
23 pay supra-competitive prices for their purchases of online digital music files.

24 **COUNT V**

25 **(VIOLATION OF CALIFORNIA'S CARTWRIGHT ACT, CALIF. BUS. AND**
26 **PROFESSIONS CODE SECTION 16700 ET. SEQ.)**

27 85. Plaintiff hereby incorporates by reference all of the allegations of this complaint with
28 the same force and effect as if fully restated herein.

86. Through the conduct alleged herein, Apple has violated the California Cartwright Act, California Business and Professions Code Section 16700 et. seq.

87. Apple's violations of the Cartwright Act have injured Plaintiff and the class members in their business and/or property by, *inter alia*, suppressing competition, and by forcing consumers, like Plaintiff and the class members, to pay supra-competitive prices for their purchases of online digital music files and/or their purchases of portable hard drive digital music players.

COUNT VI

**(VIOLATION OF CALIFORNIA'S UNFAIR COMPETITION LAW, CALIF. BUS. AND
PROF. CODE SECTION 17200 ET. SEQ.)**

88. Plaintiff hereby incorporates by reference all of the allegations of this complaint with the same force and effect as if fully restated herein.

89. The foregoing conduct amounts to an unlawful and/or unfair business practice within the meaning of the California Unfair Competition Law, California Business and Professions Code, Section 17200 et. seq.

90. Apple's violations of California's Unfair Competition Law have injured Plaintiff and the class members in their business and/or property by, *inter alia*, suppressing competition, and by forcing consumers, like Plaintiff and the class members, to pay supra-competitive prices for their purchases of online digital music files and/or their purchases of portable hard drive digital music players.

91. Because Plaintiff and the class members have conveyed money directly onto Apple, and Apple has violated the Unfair Competition Law in connection with that transaction, Plaintiff and the Class members are entitled to restitution of the moneys paid by them to Apple, and to an injunction restraining and enjoining Apple from continuing to engage in this conduct.

COUNT VII

(COMMON LAW MONOPOLIZATION)

92. Plaintiff hereby incorporates by reference all of the allegations of this complaint with the same force and effect as if fully restated herein.

93. The foregoing acts amount to unlawful monopolization under the common law of the relevant U.S. markets for the legal online sale of digital music files and/or the market for portable hard drive digital music players.

94. As a result of Apple's unlawful monopolization under the common law, Plaintiff and the class members have been injured in their business and/or property by being denied true and unfettered competition in the relevant markets described herein, and by being forced to pay supra-competitive prices for their purchases on online digital music files and/or their purchases of portable hard drive digital music players.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs pray for an Order from the Court as follows:

- a. Entering Judgment for Plaintiffs and the class and against Defendant on all counts;
- b. Certifying this action as a class action on behalf of the class defined herein, and designating Plaintiffs and their counsel as class representatives and class counsel, respectively;
- c. Directing that notice of this action be disseminated to the absent class members at Defendant's expense;
- d. Awarding Plaintiffs and the class members their compensatory and statutory money damages, including trebled damages and punitive damages where appropriate;
- e. Awarding Plaintiffs' counsel their reasonable attorneys' fees, expenses, and costs of suit;
- f. Declaring Defendant's actions to be violations of the federal and state antitrust laws, state law of unfair competition, and the common law, and enjoining Defendant from carrying on such conduct;
- g. Requiring Defendant to disgorge its ill-gotten gains, and awarding the proceeds of this disgorgement to Plaintiffs and the class members;
- h. Requiring Defendant to provide restitution to Plaintiffs and the class members of moneys paid by Plaintiffs and the class members to Defendant;
- i. Requiring Defendant to establish a common fund from which compensation can be

1 made to Plaintiffs and the class members, and from which Plaintiffs' counsel may
2 recover their reasonable attorneys' fees, expenses, and costs of suit;

3 j. Awarding such other relief as this Court deems just and appropriate.

4 **JURY DEMAND**

5 Plaintiffs demand a trial by jury on all counts so triable.

EXHIBIT A

iTunes 4 for Mac OS X: Compatible Players

Learn which digital music players and CD MP3 players you can use with iTunes 4 and Mac OS X.

iTunes 4 for Mac OS X has built-in support for digital music players and for CD MP3 players.

Notes

1. To play AAC and AAC Protected songs, your iPod must have iPod Software 1.3 or later installed. Not all digital music players can play AAC songs and only iPod can play AAC Protected songs.
2. Songs you import from an audio CD using the AAC format can be converted to MP3 files, which you can burn to MP3 CDs or play on third-party digital music players.
3. Songs purchased from the iTunes Music Store are encoded using the AAC Protected format and cannot be converted to MP3 format. You can burn them to audio CDs and play them in consumer audio CD players.

21 arsand@jonesday.com

22 Adam Richard Sand , Esq. arsand@jonesday.com

23 **Attorneys for Defendant**

24 On August 28, 2006, I served the document(s) described as:

25 **SECOND AMENDED CLASS ACTION COMPLAINT**

26 by placing a true copy(ies) thereof enclosed in a sealed envelope(s) addressed as follows:

27 Brian P. Murray, Esq.
28 MURRAY, FRANK & SAILER LLP
275 Madison Avenue
Suite 801
New York, NY 10016
Tel: (212) 682-1818
Fax: (212) 682-1892

Attorneys for Plaintiffs

1 I served the above document(s) as follows:

2 BY MAIL. I am familiar with the firm's practice of collection and processing correspondence
3 for mailing. Under that practice it would be deposited with U.S. postal service on that same day with
4 postage thereon fully prepaid at Los Angeles, California in the ordinary course of business. I am aware
that on motion of the party served, service is presumed invalid if postal cancellation date or postage
meter date is more than one day after date of deposit for mailing in an affidavit.

5 I declare that I am employed in the office of a member of the bar of this Court at whose direction
6 the service was made.

7 I further declare under penalty of perjury under the laws of the United States of America that
the above is true and correct.

8 Executed on August 28, 2006, at Los Angeles, California 90025.
